Year 1 Art

How do different materials affect drawing?

Pupils in Year 1 explored how AI can create art but as it cannot see the object, it cannot use observational drawing. We developed our drawing skills by looking carefully at light and shadow on a teddy bear and making marks with different grades of art pencils to see what effects we could make. The pupils chose to work on the smooth paper rather than the rough background and to use 4B, 5B and 6B pencils as these were soft and made the best texture and darkest tones. They also enjoyed using charcoal to make the background by blending. The final piece is an observational study linked to our Toys topic for this term.
