Paradise Cooperative  
Thursday 2nd May 2024

As part of their Science unit on plants, Year 2 attended a 'Plants and pollination' workshop at the lovely Paradise Cooperative site in Wandsworth. After having an outdoor lunch, they identified flowers and plants through observational drawings.

Pupils then took part in three activities, designed to consolidate and stretch their learning: dissecting and labelling parts of a flower; making seed bombs and finally, making a pot and planting a seed. At the end of the workshop, Year 2 played a game to identify scents and were then shown how to build a fire! An exciting time at this wonderful site.
