

## Real life Science at BWA

Year 6 have been studying the circulatory system in Science. To fully understand the parts and functions of the heart, the children observed a dissection of a lamb's heart – see the picture to the side.

The children then completed a dissection too, exploring how blood is pumped around the

When learning about the function and importance of blood, Year 6 used foods such as sweets and cooking oil to represent cells, platelets and plasma in order to create models of blood.
